

REMARKS

The present application is a U.S. national application of PCT Application No. PCT/IL2003/000923 filed on November 6, 2003. Claims 1, 19, 23, 46, 52, 70 and 73 were amended. Claims 88-112 are new. Claims 2-8, 10-11, 13, 18, 20-22, 24-45, 57-69 and 76-87 were cancelled, in order to reduce costs.

Claim 1 was amended to clarify that the transferring of the answers is performed during the survey session. In addition, claim 1 was broadened to relate to providing any summary report and not necessarily a statistical report and also to state that the report may be based on responses or answers and not necessarily on responses. Claim 1 was further amended to focus on cases in which the summary is utilized in adjusting a progression of the survey session.

Claim 19 was amended to require that the report summarizes qualitative answers or statements and not quantitative data. This amendment was made in order to make claim 19 relate to subject matter similar to that of claim 1.

Claim 46 was amended to require that the processor generates a wording for the at least one question. This amendment was made in order to differentiate from an interpretation that the design alternatives of US patent publication 2003/0088458 to Afeyan are questions.

Claim 52 was amended to differentiate from inadvertent delays.

Claim 70 was amended to state that the providing of questions is performed over a computer network and not in a single room.

Claim 73 was amended to state that the survey goal relates to statistics to be achieved and not merely a successful sale as in US patent publication 2003/0088458 to Afeyan. Claim 73 was further amended to broaden the claim by stating that the controlling could be either of the providing of questions or the transferring of the answers.

Following is a general statement of support of the new claims.

New claim 88 finds support at least on page 4, line 4. Claim 89 finds support at least in original claim 1. New claim 90 finds support at least on page 7, lines 1-2. Claims 91-93 find support at least on page 29. Claims 94, 95 and 98 find support at least in original claims 24, 52 and 42, respectively. New claim 96 finds support at least in original claims 5 and 13 and/or on page 8, line 12. New claim 97 finds support at least on page 4, line 5. New claim 99 finds support at least on page 7, lines 24-26, original claim 43 and/or page 11, lines 9-15. New claim 100 finds support at least on page 4, line 2.

192/04567 A01

New claim 101 finds support at least on page 13, line 12 and/or on page 45, line 30. Claim 102 finds support at least on page 10, lines 22-24. Claim 103 finds support at least on page 5, lines 3-8. Claims 104 and 105 find support at least on page 13, line 12.

New claims 106-109 find support at least on page 4, lines 20-30, page 25, lines 23-32 and/or page 45, lines 29-33. Claims 110 and 111 find support at least in original claims 8 and 12, respectively. New claim 112 finds support throughout the application, for example on page 15, lines 5-10.

Examination of the application is respectfully awaited.

Respectfully submitted,
Aharon Ronen MIZRAHI et al.
